How to use a Bunsen Burner

- * 1) Check connection between burner and base.
- * 2) Make sure air valve is closed.
- * 3) Attach gas hose to gas jet.
- * 4) Turn on gas slowly (listen for gas), light using flint.
- * 5) Adjust flame height at gas supply jet.
- * 6) Open air valves so that the flame turns from yellow(luminous) to blue.

The five second rule: Try to light burner for 5 seconds. If it does not light, turn gas off and wait one minute before trying again.
